

XTEND PTC CERAMIC ELEMENTS REPLACE RESISTIVE ELEMENTS & SAVE 25% ON A MONTHLY WATER HEATING BILL

- > 25% energy savings compared to resistive elements
- > Ideal for hard water applications
- > Low watt density slows down scale build up
- > Ideal for PV solar applications
- > SABS tested to SANS 514
- > Retrofits Kwikot & most other geysers
- > Simple to install by a qualified plumber
- > Cost effective way to reduce water heating bill
- > 3 year product warranty

LONGER LIFE

- > Durable marine grade 316 stainless steel casing
- > Tested to 21600 cycles (equivalent to 10+ years usage)
- > 3 year product warranty

IDEAL FOR HARD WATER AREAS

- > Lower operating temperatures (270°C) than resistive elements (500°C) which reduces precipitation of solids out of the water
- > PTC elements have a very low watt density which aids in reducing scale build up
- > Element's design increases resistance to scale build up

ENERGY SAVING

- > 25% savings on a monthly water heating bill
- > Element pays for itself through savings

SAFE AND CERTIFIED

- > Can operate in dry air, dry burn tested to 5000 cycles
- > SABS tested to SANS 514

SIMPLE TO INSTALL

- > Installation by qualified plumber
- > Retrofits Kwikot & most other geysers
